1. Truth is not determined by belief or loudness.

Wishing something to be true, or shouting it louder, doesn't make it a fact. Only evidence and reason can define truth.

2. Our founding principles start with the right to LIFE.

The Declaration of Independence affirms our inalienable rights to LIFE, Liberty, and the Pursuit of Happiness. These rights are in a deliberate order—LIFE comes first because without it no other right can exist.

3. A parent's right to happiness does not override a child's Right to LIFE.

Arguing that a parent's pursuit of happiness is more important than their child's right to LIFE is not only illogical, but also selfish and dangerous. LIFE is the most fundamental right, and claiming that rape or incest justify all abortions is ridiculous. It puts all unborn at risk.

4. LIFE begins at conception.

A unique set of DNA forms the moment an egg and sperm unite, defining a person's traits and identity. This is not a theory – it's a fact.

Proof: Identical twins' single fetus splits into two now-independent and already-complete persons just days after conception, proving that their LIFE began previously, at conception!

5. Killing an innocent person is murder.

All children, from the instant of their conception, are living, innocent people. In any civilized society the deliberate taking of an innocent life is murder. That is a moral truth that cannot be ignored if we want our nation to endure.
